EDUCATION

- **Bachelor of Computer Science and Information Technology** Cairo, Egypt
2021 – 2025

RELEVANT COURSEWORK

- **Core Computer Science:** Data Structures and Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks, Database Systems
- **Software & Mobile Development:** Mobile App Development, Software Engineering, Human-Computer Interaction (UI/UX)
- **Mathematics & Logic:** Discrete Mathematics, Calculus, Linear Algebra, Logic Design

EXPERIENCE

- **Route Academy** Cairo, Egypt
Oct 2024 – Jan 2025
Mobile Development Trainee (Flutter)
 - Completed intensive training in Flutter, Dart, and Firebase including authentication, Firestore, and real-time data handling.

- **Believe Agency** — Tanta, Egypt
Flutter Developer (Part-Time) | Feb 2026 – Present
 - Building and maintaining cross-platform mobile applications using Flutter and Dart.

Flutter Developer (Part-Time) | Feb 2026 – Present

- Published and managed **30+ mobile applications** on Google Play Store and Apple App Store.
- Handled app signing, store listings, release management, testing, and production deployments.
- Managed updates, bug-fix releases, and app review processes across both platforms.

PROJECTS

- **Capital Taxi – Kotlin & Swift:** A real-time ride-hailing app built for both Android (Kotlin) and iOS (Swift). Features include Google Maps integration, real-time tracking, user-driver matching, and Firebase backend (Auth, Firestore, Realtime DB).
- **Dalil Al Sham :**
A comprehensive city guide application for Damascus and its suburbs, enabling users to easily discover places, services, and daily opportunities. The app includes 45+ categories such as restaurants, shopping, healthcare, education, maintenance, and transportation. It also offers additional features like job listings, job search, prayer times, and local content. Built with Flutter, focusing on performance, scalability, and a seamless user experience for everyday use.
- **MoogLance (موج لانس) –**

Flutter Live: [Google Play](#) | [App](#)

[Store](#)

A freelance marketplace application that connects clients with skilled freelancers across various domains including development, design, writing, and academic consulting. The platform features a competitive bidding system, real-time chat, and an escrow payment system to ensure secure transactions and protect both parties. Users can post projects, review offers, and manage workflows efficiently. Built with Flutter and Firebase, delivering a secure, scalable, and interactive user experience.

- **Awfar (أوفر) - Flutter Live:**

[Google Play](#)

A smart discounts and savings platform for Damascus and its suburbs, helping users discover the best offers on restaurants, cafés, entertainment, shopping, beauty centers, and family activities. Users can instantly redeem discounts by scanning QR codes directly at partner stores. Built with Flutter with a focus on performance, scalability, smooth UX, and fast QR-based discount redemption. The app also supports digital wallet integrations and electronic payment solutions such as Sham Cash, with future support for Syriatel Cash and MTN Cash.

- **Muqawilak (مقاولك) – Flutter Live:** [Google Play](#) | [App Store](#)

A Saudi home services and maintenance application connecting users with trusted contractors and technicians across different cities in Saudi Arabia. The app allows users to easily request services such as electrical work, plumbing, painting, carpentry, renovation, and general maintenance, while helping them quickly find suitable service providers based on city and area. Built with Flutter with a focus on simplicity, scalability, performance, and a smooth user experience.

- **Meyar Al Etqan (معيار الاتقان) – Flutter:**

A dual-role service marketplace application connecting clients with skilled technicians for various services. The app provides two separate interfaces for customers and service providers, allowing clients to request services and technicians to accept and manage jobs efficiently. Key features include real-time service requests, order tracking, user profiles, and seamless communication between both parties. Built with Flutter, focusing on scalability, clean architecture, and a smooth user experience for both roles.

- **Sarfak (صرفك) – Expense Tracker & Budget Manager |**

Flutter Live: [Google Play](#)

A personal finance and expense tracking application that helps users manage their budget and monitor daily spending.

The app allows users to record expenses, organize them by categories, and view clear summaries of their spending habits.

- Developed using **Flutter and Dart** with a clean and responsive UI.
- Implemented **expense tracking, categorized spending, and monthly budget management**.
- Provided **visual summaries and reports** to help users understand spending patterns.
- Designed a **simple and user-friendly interface** for quick daily expense logging.

- **Bawabat Al Jazeera (بوابة الجزيرة) – Flutter Live:** [Google Play](#)

- A comprehensive digital community platform designed to connect residents, businesses, and local projects in one place, making it easier to access daily services, opportunities, and local information quickly and efficiently. The app includes features such as local projects and initiatives, job listings and job search, a places and services directory, an open marketplace, advanced advertising systems, promotional banners, instant notifications, prayer times, currency converter, and daily weather updates. Built with Flutter with a focus on scalability, performance, and seamless user experience.

- **Talabat Clone – Flutter & Laravel (Under Development)**

A full-featured food delivery application inspired by Talabat, connecting users with restaurants for seamless ordering and delivery. The system includes a Flutter mobile app for customers and a Laravel backend for managing orders, users, and

restaurants. Key features include restaurant browsing, menu management, cart system, real-time order tracking, and secure authentication. Built with Flutter for the frontend and Laravel for a scalable and robust backend architecture.

- **News App – Flutter:** News application using NewsAPI, featuring category-based browsing, dark mode, caching, and search. Built with Bloc and REST API.
- **E-Commerce App – Flutter:** A complete shopping app with product catalog, cart, Stripe payment integration, and Firebase Auth. Built with responsive UI and clean architecture.
- **Filmico (Movies App) – Flutter:** App to browse trending, upcoming, and top-rated movies using TMDb API. Includes detailed movie pages, trailers, and search functionality. reached over 100+ downloads on internal testing; includes 20+ UI screens and offline caching.

TECHNICAL SKILLS

- **Programming Languages:** Dart, Kotlin, Swift, Java, C++, C#, Python, JavaScript, SQL, HTML
- **Mobile Development:** Flutter, Android SDK (Kotlin), Swift (iOS)
- **Backend & Cloud:** Firebase (Auth, Firestore, Realtime DB, FCM), RESTful APIs, Supabase
- **State Management:** Bloc, Provider, Riverpod
- **Tools:** Git & GitHub, VS Code, Android Studio, Xcode, Postman,

Figma **Other:** Google Maps SDK, Stripe API, Clean Architecture, MVC & MVVM

SOFT SKILLS

- Problem Solving, Communication, Teamwork, Time Management, Adaptability
